New Life! – Science and Computing Led Topic

Many of the key Science skills will be taught as part of Science lessons.

Topic lessons are used to cover part of the Computing curriculum – the projects link to Science concepts.

Summer Class	Autumn Class	Winter Class
--------------	--------------	--------------

Key information: Ask a question that is looking for a pattern based on their observation, give commands one at a time to control direction and movement, including straight, forwards, backwards, turn. Control the nature of events: repeat, loops, single events and add and delete features. Give a set of instructions to follow and predict what will happen. Improve/change their sequence of commands by debugging. Save, retrieve and organise work. Use software to record and change sounds.

When have you learned about the environment before in school?

Key vocabulary:

pattern command direction movement

loop loops delete instructions save

prediction debug algorithm software
